

---

**Requests for travel vaccination advice**

(Please keep this page for your own information)

Please complete the attached form and return it to the Surgery. A separate form should be filled in for each individual travelling. A nurse will then complete the form within 3 working days of receiving it, advising you on what, if any, vaccinations and malaria tablets are recommended and review at the appointment if necessary.

**No appointment will be made by the receptionists until the form has been completed. There are additional charges for any other vaccinations not available on the NHS. If no vaccinations are required, the nurse will contact you and the appointment will be cancelled.**

It is advised you have an appointment for vaccinations a minimum of 2 weeks before travel. Please allow longer if possible, ideally 4-6 weeks. Back packers should give as much notice as possible as additional vaccinations which are often advised may be as a course over a month or more. If you are travelling at short notice and are unable to wait for an appointment, you can attend one of the Travel Clinics listed or visit one of the websites:

[fitfortravel.nhs.uk](http://fitfortravel.nhs.uk) designed for public rather than health professionals- very similar to site we use, excellent to work out malaria needs and information on all vaccinations and regimes.
